FOREWORD

The Government of Kenya is committed to ensuring that policy objectives for Education, Training, and Research meet the aspirations of the Constitution of Kenya 2010, the Kenya Vision 2030, the National Curriculum Policy 2019, the United Nations Sustainable Development Goals (SDGs), and the regional and global conventions to which Kenya is a signatory. Towards achieving the mission of basic education, the Ministry of Education (MoE) has successfully and progressively rolled out the implementation of the Competency Based Curriculum (CBC) at Pre-Primary, Primary and Junior School levels.

The implementation of the Competency Based Curriculum involves monitoring and evaluation to determine its success. After the five-year implementation cycle, a summative evaluation of the primary education cycle was undertaken to establish the achievement of learning outcomes as envisaged in the Basic Education Curriculum Framework. The Government of Kenya constituted a Presidential Working Party on Education Reforms (PWPER) in 2022 to address salient issues affecting the education sector. PWPER made far-reaching recommendations for basic education that necessitated curriculum review. The recommendations of the PWPER, monitoring reports, summative evaluation of the primary education cycle and feedback from curriculum implementers and other stakeholders led to rationalisation and review of the basic education curriculum.

The reviewed Grade 8 curriculum designs build on competencies attained by learners at the end Grade 7. Further, they provide opportunities for learners to continue exploring and nurturing their potential as they prepare to transit to Senior School.

The curriculum designs present the National Goals of Education, essence statements, general and specific expected learning outcomes for the subjects as well as strands and sub-strands. The designs also outline suggested learning experiences, suggested key inquiry questions, core competencies, Pertinent and Contemporary Issues (PCIs), values, and the assessment rubric. It is my hope that all government agencies and other stakeholders in Education will use the designs to plan for effective and efficient implementation of the CBC.

**HON. EZEKIEL OMBAKI MACHOGU, CBS
CABINET SECRETARY,
MINISTRY OF EDUCATION**

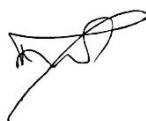

PREFACE

The Ministry of Education (MoE) nationally implemented the Competency Based Curriculum (CBC) in 2019. Grade 8 is the second grade of Junior School in the reformed education structure.

The reviewed Grade 8 curriculum furthers implementation of the CBC from Grade 7 at the primary education level. The main feature of this level is a broad curriculum for the learner to explore talents, interests, and abilities before selection of pathways and tracks at the Senior School education level. This is very critical in the realisation of the Vision and Mission of the ongoing curriculum reforms as enshrined in the Sessional Paper No. I of 2019: *Towards Realizing Quality, Relevant and Inclusive Education and Training for Sustainable Development* in Kenya. The Sessional Paper explains the shift from a Content-focused Curriculum to a focus on **Nurturing Every Learner's potential**.

Therefore, the Grade 8 curriculum designs are intended to enhance the learners' development of the CBC core competencies, namely: Communication and Collaboration, Critical Thinking and Problem-solving, Creativity and Imagination, Citizenship, Digital Literacy, Learning to Learn, and Self-efficacy.

The curriculum designs provide suggestions for interactive and differentiated learning experiences linked to the various sub-strands and the other aspects of the CBC. They also offer several suggested learning resources and a variety of assessment techniques. It is expected that the design will guide teachers to effectively facilitate learners to attain the expected learning outcomes for Grade 8 and prepare them for a smooth transition to Grade 9. Furthermore, it is my hope that teachers will use the designs to make learning interesting, exciting, and enjoyable.

**DR. BELIO KIPSANG', CBS
PRINCIPAL SECRETARY
STATE DEPARTMENT FOR BASIC EDUCATION
MINISTRY OF EDUCATION**

ACKNOWLEDGEMENT

The Kenya Institute of Curriculum Development (KICD) Act Number 4 of 2013 (Revised 2019) mandates the Institute to develop and review (*SNE adapt*) curricula and curriculum support materials for basic and tertiary education and training. The curriculum development process for any level of education involves thorough research, international benchmarking, and robust stakeholder engagement. Through a systematic and consultative process, the KICD conceptualised the Competency Based Curriculum (CBC) as captured in the Basic Education Curriculum Framework (BECF) 2017. The curriculum responds to the demands of the 21st Century and the aspirations captured in the Constitution of Kenya 2010, the Kenya Vision 2030, the East African Community Protocol, the International Bureau of Education Guidelines and the United Nations Sustainable Development Goals (SDGs).

KICD receives its funding from the Government of Kenya to facilitate the achievement of its stipulated mandate and implementation of the Government and Sector (Ministry of Education -MoE) plans. The Institute also receives support from development partners targeting specific programmes. The revised Grade 8 curriculum designs were developed with the support of the World Bank through the Kenya Primary Education Equity in Learning Programme (KPEELP); a project coordinated by MoE. Therefore, the Institute is very grateful to the Government of Kenya, through the MoE and the development partners for the policy, resource, and logistical support. Specifically, special thanks goes to the Cabinet Secretary-MoE and the Principal Secretary - State Department of Basic Education.

We also wish to acknowledge the KICD curriculum developers and other staff, all teachers and educators who took part as panelists; the Semi-Autonomous Government Agencies (SAGAs), and representatives of various stakeholders for their roles in the development of the Grade 8 curriculum designs. In relation to this, we acknowledge the support of the Chief Executive Officers of the Teachers Service Commission (TSC) and the Kenya National Examinations Council (KNEC) during the process of developing these designs. Finally, we are very grateful to the Chairperson of the KICD Council and other members of the Council for the very consistent guidance throughout the process.

We assure all teachers, parents and other stakeholders that this curriculum design will effectively guide the implementation of the CBC in Grade 8 and the preparation of learners for transition to Grade 9.

**PROF. CHARLES O. ONG'ONDO, PhD, MBS
DIRECTOR/CHIEF EXECUTIVE OFFICER
KENYA INSTITUTE OF CURRICULUM DEVELOPMENT**

NATIONAL GOALS OF EDUCATION

Education in Kenya should:

1. Foster nationalism and patriotism and promote national unity

The people of Kenya belong to different communities, races and religions, but these differences need not divide them. They must be able to live and interact as Kenyans. It is a paramount duty of education to help young people acquire this sense of nationhood by removing conflicts and promoting positive attitudes of mutual respect, to live together in harmony and foster patriotism, and to make a positive contribution to the life of the nation.

2. Promote the social, economic, technological, and industrial needs for national development

Education should prepare the youth of the country to play an effective and productive role in the life of the nation.

a) Social Needs

Education in Kenya must prepare children for changes in attitudes and relationships, which are necessary for the smooth progress of a rapidly developing modern economy. There is bound to be a silent social revolution following the wake of rapid modernisation. Education should assist our youth to adapt to this change.

b) Economic Needs

Education in Kenya should produce citizens with the skills, knowledge, expertise and personal qualities that are required to support a growing economy. Kenya is building up a modern and independent economy that requires an adequate and relevant domestic workforce.

c) Technological and Industrial Needs

Education in Kenya should provide learners with the necessary skills and attitudes for industrial development. Kenya recognises the rapid industrial and technological changes taking place, especially in the developed world. We can only be part of this development if our education system is deliberately focused on the knowledge, skills and attitudes that will prepare our young people for these changing global trends.

3. Promote individual development and self-fulfillment

Education should provide opportunities for the fullest development of individual talents and personality. It should help children to develop their potential interests and abilities. A vital aspect of individual development is the building of character.

4. Promote sound moral and religious values

Education should provide for the development of knowledge, skills and attitudes that will enhance the acquisition of sound moral values and help children to grow up into self-disciplined, self-reliant and integrated citizens.

5. Promote social equity and responsibility

Education should promote social equality and foster a sense of social responsibility within an education system that provides equal educational opportunities for all. It should give all children varied and challenging opportunities for collective activities and corporate social service irrespective of gender, ability or geographical environment.

6. Promote respect for and development of Kenya's rich and varied cultures

Education should instill in the youth of Kenya an understanding of past and present cultures and their valid place in the contemporary society. Children should be able to blend the best of traditional values with the changing requirements that must follow rapid development to build a stable and modern society.

7. Promote international consciousness and foster positive attitudes towards other nations

Kenya is part of the international community. It is part of the complicated and interdependent network of peoples and nations. Education should therefore lead the youth of the country to accept membership of this international community with all the obligations and responsibilities, rights and benefits that this membership entails.

8. Promote positive attitudes towards good health and environmental protection

Education should inculcate in young people the value of good health for them to avoid indulging in activities that will lead to physical or mental ill health. It should foster positive attitudes towards environmental development and conservation. It should lead the youth of Kenya to appreciate the need for a healthy environment.

LEARNING OUTCOMES FOR JUNIOR SCHOOL

By end of Junior School, the learner should be able to:

1. Apply literacy, numeracy and logical thinking skills for appropriate self-expression.
2. Communicate effectively, verbally and non-verbally, in diverse contexts.
3. Demonstrate social skills, spiritual and moral values for peaceful co-existence.
4. Explore, manipulate, manage, and conserve the environment effectively for learning and sustainable development.
5. Practise relevant hygiene, sanitation and nutrition skills to promote health.
6. Demonstrate ethical behaviour and exhibit good citizenship as a civic responsibility.
7. Appreciate the country's rich and diverse cultural heritage for harmonious co-existence.
8. Manage pertinent and contemporary issues in society effectively.
9. Apply digital literacy skills for communication and learning.

ESSENCE STATEMENT

Social Studies is an integrated subject that includes aspects of History, Geography, Citizenship and Life Skills Education. The main theme of Social Studies is “Living Together”. It enables the learner to be aware and concerned about the welfare of others, protect the environment, and be active at community, national, regional, and global levels. The Learning area aims at providing the learner with knowledge, skills, values and attitudes, necessary for good character formation to enable them live harmoniously in the society. It equips the learner with psychosocial competencies that enables him/her effectively deal with the demands and challenges of everyday life.

Social Studies is anchored on the tenets of the Constitution of Kenya 2010, the Kenya Vision 2030, the National Goals of Education, and the Kenya Sessional Paper No. 8 of 2013 on national values and principles of governance. It is also in line with the Africa Agenda 2063 and the Strategic Objective 10 of the Continental Education Strategy for Africa (2016-2025), that envisions “an integrated, prosperous and peaceful Africa”. In addition, Social Studies addresses the 2017 African Union (AU) Ministers of Education decision to integrate general history of Africa in school curricula and aspirations of SDG 4: Target 7 and Goal 16. It is also anchored on the National Education Sector Strategic Plan (2018-2022), which builds on the successes and

challenges of previous sectoral plans, champions a value-based education system and the need to transmit life skills, principles and values for personal, social and economic development.

The learning area is anchored on theories of learning such as Jean Piaget's theory of cognitive development, Lawrence Kohlberg theory of moral development, Dewey's social constructivism, and Vygotsky's socio-cultural development theory.. Social Studies will prepare the learners for the social sciences pathway in Senior School.

SUBJECT GENERAL LEARNING OUTCOMES

By the end of Junior School, the learner should be able to:

- 1) Demonstrate an understanding of historical concepts, historical sources and evidence for the development of identity and a sense of belonging.
- 2) Develop psychosocial competencies to navigate through challenges in day-to-day life.
- 3) Appreciate themselves and other people, be proud of their Kenyan cultural heritage and be willing to further develop, preserve, and share this heritage globally.
- 4) Develop and apply values, positive attitudes, principles of democracy, governance and human rights for mutual social responsibility.
- 5) Understand the value of conservation and management of environments and their influence on human activities and use for sustainable development.
- 6) Contribute to the management of pertinent and contemporary issues as an informed, engaged, empowered, ethical and responsive citizen.
- 7) Develop and apply social research and digital literacy competencies to interpret phenomena for problem-solving and decision-making in society.

SUMMARY OF STRANDS AND SUB-STRANDS

	Strand	Sub-Strand	Suggested Number of Lessons
1.0	Social Studies and Personal Management	Self-Improvement	4
		Self- Esteem Assessment	4
2.0	Community Service Learning	Community Service-Learning Project	8
3.0	People and Relationships	Scientific Theory about Human Origin	6
		Early Civilisations	8
		Trans Saharan Slave Trade	6
		Population Growth in Africa	6
		Diversity and Interpersonal skills	8
		Peaceful Conflict Resolutions	8
4.0	Natural and Historic Built Environments	Map Reading and Interpretation	12
		Weather and Climate	10
		Vegetation in Africa	8
		Historical sites and monuments in Africa	8
5.0	Political Developments and Governance	The Constitution of Kenya	6
		Human Rights	8
		Citizenship	10
Total Number of Lessons			120

Note: The suggested number of lessons per sub-strand may be less or more depending on the context.

STRAND 1.0: SOCIAL STUDIES AND PERSONAL MANAGEMENT

Strand	Sub-Strand	Specific Learning Outcomes	Suggested Learning Experiences	Suggested Key Inquiry Question(s)
1.0 Social Studies and Personal Management	1.1 Self-Improvement <i>(4 lessons)</i>	<p>By the end of the sub-strand, the learner should be able to:</p> <ul style="list-style-type: none"> a) describe personality traits for self-understanding, b) share goals for self-improvement in social life, c) appreciate the role of values in the development of personality traits. 	<p>The learner is guided to:</p> <ul style="list-style-type: none"> ● choose the animal that best defines their personal characteristics from a list of pre-selected animals, then discuss the outcome with the class, ● watch a video clip on personality traits and discuss, ● develop and share personal life goals such as <i>educational, careers,</i> ● watch a video clip of a successful career individual in social life that reflect on their traits, ● role-play a skit depicting values in their dream career choice in Social Studies. 	<p>1. Which animal best reflects your personal characteristics?</p> <p>2. What career choices in Social Studies relate to you?</p>

Core competencies to be developed:

- Communication and Collaboration: speaking skills are developed as learners share personal life goals.
- Imagination and Creativity: learners reflect on their future life goals as they watch video clips of successful career individuals in Social Studies.

Pertinent and contemporary issues (PCIs):

Career guidance: learners identify their career paths as they watch a video clip on a successful career individual in Social Studies.

Values:

- Unity: learners work together in role-playing a skit depicting values in their dream career choice in Social Studies.
- Respect: learners give one another a chance to participate in discussions on personal characteristics.

Link to other subjects:

- Pre-Technical Studies: learners get career guidance on the choice of their future careers in Social Studies.
- Kenyan Sign Language, Kiswahili and English: learners role-play a skit depicting values in their dream career choice in Social Studies.

Strand	Sub-Strand	Specific Learning Outcomes	Suggested Learning Experiences	Suggested Key Inquiry Question(s)
1.0 Social Studies Personal Management	1.2 Self-Esteem Assessment <i>(4 lessons)</i>	<p>By the end of the sub-strand, the learner should be able to:</p> <ul style="list-style-type: none"> a) explain the contribution of self-esteem on their holistic development, b) determine effects of unhealthy self-esteem in day-to-day social lives, c) assess their self-esteem in social interactions, d) desire to improve their self-esteem for personal productivity. 	<p>The learner is guided to:</p> <ul style="list-style-type: none"> ● use digital or print resources to search for and discuss the relationship between self-esteem and personal productivity, ● research using print/digital devices on the contribution of self-esteem on their holistic development, ● act out and discuss skits on examples of difficult life experiences that could severely affect self-esteem in their social lives, ● discuss and present effects of unhealthy self-esteem in day-to-day social lives, such as: <i>relationship difficulties, social isolation</i>, ● discuss and share ways of assessing their self-esteem in social interactions, ● journalise actions they will take to improve their self-esteem. 	How does self-esteem affect my holistic development?

Core competencies to be developed:

- Communication and Collaboration: learners develop speaking skills as they discuss cultural beliefs that promote self-esteem.
- Digital literacy: learners use digital devices to search for the relationship between self-esteem and personal productivity.

Pertinent and contemporary issues (PCIs):

- Guidance and Peer counselling: learners discuss and share ways of seeking help to overcome low self-esteem.
- Social cohesion: learners work together in groups to discuss cultural beliefs that promote self-esteem.

Values:

- Love: learners honestly journalise on steps they would take to improve their self-esteem.
- Responsibility: learners commit themselves through journalising actions they will take to improve their self-esteem.

Link to other subjects:

- Religious Education: learners discuss self-love from religious texts.
- Kenyan Sign Language, Kiswahili and English: learners make journal entries on steps they would take to improve their self-esteem.

Suggested Assessment Rubric

Level Indicators	Exceeds Expectations	Meets Expectations	Approaches Expectations	Below Expectations
Ability to explain the contribution of self-esteem on their holistic development.	Explains the contribution of self-esteem on their holistic development citing all contexts.	Explains the contribution of self-esteem on their holistic development citing most contexts.	Explains the contribution of self-esteem on their holistic development omitting few contexts.	Explains the contribution of self-esteem on their holistic development leaving out most contexts.
Ability to determine effects of unhealthy self-esteem in day-to-day social lives,	Determines effects of unhealthy self-esteem in day-to-day social lives citing major examples.	Determines effects of unhealthy self-esteem in day-to-day social lives citing good examples.	Determines effects of unhealthy self-esteem in day-to-day social lives leaving out some examples.	Determines effects of unhealthy self-esteem in day-to-day social lives leaving out major examples.
Ability to determine effects of unhealthy self-esteem in day-to-day lives.	Determines effects of unhealthy self-esteem in day-to-day lives giving major incidences.	Determines effects of unhealthy self-esteem in day-to-day lives giving most incidences.	Determines effects of unhealthy self-esteem in day-to-day lives leaving out minor incidences.	Determines effects of unhealthy self-esteem in day-to-day lives leaving out most incidences.
Ability to assess their self-esteem in social interactions,	Assesses their self-esteem in social interactions different scenarios	Assesses their self-esteem in social interactions with scenarios	Assesses their self-esteem in social interactions omits some scenarios	Assesses their self-esteem in social interactions major scenarios.

STRAND 2.0 COMMUNITY SERVICE LEARNING

Strand	Sub-Strand	Specific Learning Outcomes	Suggested Learning Experiences	Suggested Key Inquiry Question(s)
2.0 Community Service Learning	2.1 Community Service Learning Project (8 lessons)	By the end of the Community Service Learning (CSL) project, the learner should be able to: <ol style="list-style-type: none"> identify a problem/gap in the community, design solution(s) to the identified problem, plan to implement the solution to the identified problem, implement plan for solving the identified problem, report/account on the concluded project, appreciate the need to offer solutions to the gaps/challenges in the community. 	The learner is guided to: <ul style="list-style-type: none"> brainstorm and identify problems/gaps/opportunities in their school/community that need attention, speak engagingly when discussing and adapting one identified (problem/gap) for the class/group project and hence state the project title, authenticate the problem/gap and hence write down the statement of the problem (a small description of the identified problem), search, discuss and agree on an appropriate solution/way/skills of addressing the identified problem and note down the recommended/proposed solution, discuss and draw a plan for implementing the proposed solution, 	1. How does one determine some gaps/ needs in the community? 2. Why is it necessary to make adequate preparations before embarking on a project?

			<ul style="list-style-type: none"> ● implement the plan prudently to address the identified problem, ● reflect on the concluded project and submit a summary account/report to the CSL teacher. 	
--	--	--	---	--

Core competencies to be developed:

- Communication and Collaboration: Learners speak engagingly as they discuss and work on various CSL project/activity processes.
- Self-efficacy: Learners develop the skills of self-awareness and leadership as they undertake the CSL project.
- Creativity and Imagination: Learners come up with creative ways of solving the identified problem in the community.
- Critical thinking and Problem solving: Learners identify a community need or gaps and explore possible solutions to address the gaps.
- Digital literacy: Learners use technology as they search for solutions to the identified problem in the community.
- Learning to learn: Learners gain new knowledge and skills as they work together to address a community problem in the project.
- Citizenship: Learners choose a PCI that needs immediate attention in the community.

Values:

- Integrity: Learners choose to visit appropriate sites as they use digital devices to carry out research and also use resources in the process of planning to address the community problem.
- Respect: Learners accommodate divergent opinions of others as they discuss, search, and plan for the project in the community.
- Unity: Learners work collaboratively to carry out the CSL project.

Pertinent and contemporary issues (PCIs):

Social cohesion: Learners discuss possible solutions to the identified issue in groups.

Suggested Assessment Rubric

Indicator \ Level	Exceeds Expectations	Meeting Expectations	Approaches Expectations	Below Expectations
Ability to identify a problem/gap in the community.	Learner identifies a problem/gap in the community in detail.	Learner identifies a problem/gap in the community.	Learner identifies a problem/gap in the community with some details.	Learner identifies a problem/gap in the community with no details.
Ability to propose solution(s) to the identified problem.	Learner proposes solution(s) to the identified problem in varied contexts.	Learner proposes solution(s) to the identified problem.	Learner proposes solution(s) to the identified problem in a few contexts.	Learner proposes solution(s) to the identified problem in limited contexts.
Ability to design a plan to solve the identified problem.	Learner designs a plan to solve the identified problem with rich details.	Learner designs a plan to solve the identified problem.	Learner designs a plan to solve the identified problem but leaves out minor details.	Learner designs a plan to solve the identified problem but leaves out major details.

Ability to implement the plan for solving the identified problem.	Learner implements a plan for solving the identified problem following all the steps and makes reviews.	Learner implements a plan for solving the identified problem.	Learner implements a plan for solving the identified problem but leaves out minor steps.	Learner implements a plan for solving the identified problem but leaves out most of the steps.
Ability to report/account on the concluded project.	Learner reports/accounts on the concluded project in detail.	Learner reports/accounts on the concluded project.	Learner reports /accounts on the concluded project but leaves out minor details.	Learner reports/accounts on the concluded project but leaves out major details.

STRAND 3.0: PEOPLE AND RELATIONSHIPS

Strand	Sub-Strand	Specific Learning Outcomes	Suggested Learning Experiences	Suggested Key Inquiry Question(s)
3.0 People and Relationships	3.1 Scientific Theory about Human Origin (6 Lessons)	<p>By the end of the sub-strand, the learner should be able to:</p> <ul style="list-style-type: none"> a) explore scientific theory about human origin, b) illustrate changes that took place in humans as a result of evolution, c) draw conclusions on origin of humanity based on the scientific theory, d) illustrate strategies of preservation of remains of early humans, e) develop reasons why Africa is considered as the cradle for humanity, 	<p>The learner is guided to:</p> <ul style="list-style-type: none"> ● enhance the skill of teamwork as they discuss in groups how scientific theory is used to explain human origin and present, ● use print/digital devices on changes that took place in humans as a result of evolution, ● draw a map of Africa and locate where prehistoric human remains were discovered, ● draw charts showing the different stages of human evolution and share in class, ● generate conclusions on origin of humanity based on the scientific theory, ● engage with a resource person to discuss the preservation of remains of early humans, 	Why is Africa considered as the cradle of humanity?

		<p>f) recognise reasons why Africa as the cradle of humanity.</p>	<ul style="list-style-type: none"> ● work together harmoniously in groups to discuss reasons why Africa is considered as the cradle for humanity, ● engage in assigned roles and duties as they debate on the Africa as the cradle of humanity. 	
--	--	---	---	--

Core competencies to be developed:

- Communication and Collaboration: Learners enhance the skill of teamwork during group discussion on how scientific theory is used to explain human origin.
- Digital literacy: The learners use print/digital devices on changes that took place in humans as a result of evolution.

Values:

- Respect: Learners engage in assigned roles and duties as they debate on the Africa as the cradle of humanity
- Responsibility: Learners work together harmoniously in groups to discuss reasons why Africa is considered as the cradle for humanity.

Pertinent and contemporary issues (PCIs):

- Social cohesion: Learners engage with a resource person to discuss the preservation of remains of early humans.

Link to other subjects:

- The learner applies Languages skills-learners to draw charts showing the different stages of human evolution and share in class.
- The learner applies Creative Arts skills as they draw charts showing the different stages of human evolution.

Strand	Sub-Strand	Specific Learning Outcomes	Suggested Learning Experiences	Suggested Key Inquiry Question(s)
3.0 People and Relationships	3.2 Early Civilisation • <i>Asia,</i> • <i>Europe</i> (8 Lessons)	By the end of the sub-strand, the learner should be able to: a) describe Swahili civilisation along the East African coast, b) show how best practices from early civilisations have contributed to the modern world, c) appreciate best practices of early civilisation to the development of the modern world.	The learner is guided to: <ul style="list-style-type: none"> • use digital technology to locate on a map of Europe and Asia, places of origin of early visitors to the East African Coast, • accommodate divergent opinions in groups as they discuss on the origin of early visitors to the East African Coast up to 1500, • exhibit cultural awareness as they brainstorm on the Swahili civilisation along the East African coast and discuss factors that led to the growth of East African city states, • role-play the best practices from early civilisations to the development of the modern world. 	Why is cultural heritage important to society?

Core competencies to be developed:

- Digital literacy: Learners use digital technology to locate on a map of Europe and Asia, places of origin of early visitors to the East African Coast.
- Learning to learn: Learners reflect on their own during role-play the best practices from early civilisations to the development of the modern world.

Values:

- Respect: Learners accommodate divergent opinions during group discussion on the origin of the early visitors in the East African Coast.
- Patriotism: Learners exhibit cultural awareness as they brainstorm on the Swahili civilisation along the East African coast and discuss factors that led to the growth of East African city states.

Pertinent and contemporary issues (PCIs):

Cultural awareness: Learners work together in brainstorming on the origin of early visitors to the East African Coast up to 1500.

Link to other subjects:

The learner applies Language skills during group discussion on the origin of the early visitors in the East African Coast.

Strand	Sub-Strand	Specific Learning Outcomes	Suggested Learning Experiences	Suggested Key Inquiry Question(s)
3.0 People and Relationships	3.3 Trans Saharan Slave Trade (6 Lessons)	By the end of the sub-strand, the learner should be able to: a) identify factors that led to development of Trans-Saharan slave Trade in Africa, b) describe organisation of Trans-Saharan slave trade in Africa, c) outline effects of Trans-Saharan slave trade in Africa, d) demonstrate assertiveness in promotion of social justice, e) desire to promote social justice in a society.	The learner is guided to: <ul style="list-style-type: none">● debate on factors that led to development of Trans-Saharan slave trade in Africa,● use digital or print resources to research on the organisation of Trans-Saharan slave trade in Africa,● work together and discuss the effects of Trans-Saharan slave trade in Africa,● take turns in activities and conversation as they draw a map of Africa and locate regions where slaves were sourced during the Trans-Saharan slave trade,● use slogans to show e assertiveness in promotion of social justice,● compose songs/messages to promote social justice in a society.	Why do people subject others to slave trade?

Core competencies to be developed:

- Digital literacy: Learners use digital or print resources to research on the organisation of Trans-Saharan slave trade in Africa.
- Creativity and Imagination: Learners debate on factors that led to development of Trans-Saharan slave trade in Africa.

Values:

- Respect: Learners work together and discuss the effects of Trans-Saharan slave trade in Africa.
- Unity: Learners take turns in activities and conversation as they draw a map of Africa and locate regions where slaves were sourced during the Trans-Saharan slave trade.

Pertinent and contemporary issues (PCIs):

Social cohesion: Learners work together amicably as they debate on factors that led to development of Trans-Saharan slave trade in Africa.

Link to other subjects:

The learner applies Creative Arts skills as they draw a map of Africa and locate regions where slaves were sourced during the Trans-Saharan slave trade.

Strand	Sub-Strand	Specific Learning Outcomes	Suggested Learning Experiences	Suggested Key Inquiry Question(s)
3.0 People and Relationships	3.4 Population Growth in Africa (6 lessons)	By the end of the sub-strand, the learner should be able to; a) explore causes and effects of population growth in Africa, b) examine types and effects of migration in Africa, c) illustrate demographic trends in Kenya, d) create awareness on the effects of population growth in the community, e) appreciate the impact of migration on population growth in Africa.	The learner is guided to: <ul style="list-style-type: none">● brainstorm in groups causes of population growth in Africa,● use digital and print resources to research on the causes and effects of population growth in Africa,● discuss the effects of high population road users safely – present in class,● develop self-confidence as they draw demographic trends in Kenya using recent census data,● brainstorm in groups on types of migration,● exchange new ideas as they research on the factors that influence migration in Africa and share in class,● exhibit team spirit as they develop posters to create awareness of the effect of population growth in the community,	Why is it important to study demographic changes?

		<ul style="list-style-type: none"> ● design charts on ways of coping with stress due to population growth and migrations, ● use charts to write on the impact of migration on population growth in Africa. 	
--	--	--	--

Core competencies to be developed:

- Self-efficacy: Learners develop self-confidence during illustration of demographic trends in Kenya and display in the classroom.
- Creativity and Imagination: Learners exchange new ideas during research on the factors that influence migration in Africa.

Values:

- Unity: Learners exhibit team spirit in developing posters to create awareness of the effects of population growth in the community.
- Love: Learners exhibit respect for others when working in groups during brainstorming on causes of population growth in Africa.

Pertinent and contemporary issues (PCIs):

Environmental education: Learners demonstrate knowledge on prevention of pollution as they develop posters to create awareness on effects of population growth in the community.

Link to other subjects:

The learner applies calculating skills in Mathematics when working out demographic trends in Kenya using recent census data.

Strand	Sub-Strand	Specific Learning Outcomes	Suggested Learning Experiences	Suggested Key Inquiry Question(s)
3.0 People and Relationships	3.5 Diversity and interpersonal skills (8 lessons)	By the end of the sub-strand, the learner should be able to: a) explore social cultural diversities in Kenya, b) explain ways of building a healthy self-esteem in diverse social cultural society, c) describe the impact of emotions on self and others, d) manage peer pressure in a culturally diverse environment, e) appreciate social cultural diversities in Kenya.	The learner is guided to: <ul style="list-style-type: none"> ● exhibit respect for fellow citizens as they discuss the social cultural diversities in Kenya, ● explain their own beliefs and those of others as they discuss ways of building a healthy self-esteem in diverse social cultural society, ● use digital or print material to find out the impact of emotions on self and others, ● practice inclusivity as they role play ways of managing peer pressure, ● in groups, compose communication messages on social cultural diversities in Kenya and share in class. 	How can we demonstrate respect and appreciation of social cultural diversity and inclusion?

Core competencies to be developed:

- Self-efficacy: Learners develop self-confidence when acting out in small groups, skits exhibiting values that enhance positive peer pressure.
- Citizenship: Learners explore their own beliefs and those of others as they carry out group discussion on social cultural diversity in Kenya.

Values:

- Patriotism: Learners exhibit respect for fellow citizens as they discuss socio-cultural diversities in Kenya.
- Love: Learners avoid inflicting emotional pain on others when role-playing expressions of different emotions.

Pertinent and contemporary issues (PCIs):

- Social cohesion: Learners work together harmoniously when role-playing to express different emotions.
- Ethnic and racial relation: Learners respect and accept heterogeneity as they discuss personal and social cultural factors that influence social cohesion.

Link to other subjects:

Learner applies values in Religious Education as they learn about exhibition of values that enhance positive peer pressure.

Strand	Sub-Strand	Specific Learning Outcomes	Suggested Learning Experiences	Suggested Key Inquiry Question(s)
3.0 People and Relationships	3.6 Peaceful Conflict Resolution <ul style="list-style-type: none"> ● Negotiation ● <i>Mediation</i> ● Arbitration (8 lessons)	By the end of the sub-strand, the learner should be able to; <ol style="list-style-type: none"> a) identify situations that lead to conflicts in the family, b) apply peaceful ways of resolving conflicts in the family, c) design strategies for effective communication in resolving conflicts, d) build healthy relationships to promote peace in the family, e) show empathy with survivors of conflicts in the family, f) appreciate the culture of peace in a society. 	The learner is guided to: <ul style="list-style-type: none"> ● speak clearly as they discuss and present situations that may lead to conflicts in a family, ● work together harmoniously as they role-play peaceful ways of resolving conflicts in the family, ● create posters with strategies to enhance effective communication in resolving conflicts, ● undertake group activities and exchange new ideas as build healthy relationships to promote peace in the family, ● use digital or print resources to research on ways of building healthy relationships, ● reflect in journal in their the culture of peace in a society. 	How can resolving conflicts help us live peacefully in the community?

Values:

- Peace: Learners resolve differences amicably when role-playing peace-building scenarios.
- Unity: Learners display team spirit as they work in groups to compose poems on the importance of peace in the family and present in class.

Pertinent and contemporary issues (PCIs):

Social cohesion: Learners work together harmoniously when role-playing peace-building scenarios.

Link to other subjects:

The learner applies Language skills when discussing and presenting on situations that may lead to conflicts.

Suggested Assessment Rubric

Level Indicator	Exceeds Expectations	Meets Expectations	Approaches Expectations	Below Expectations
Ability to explore scientific theory about human origin on formation of personal identity.	Learner explores scientific theory about human origin on formation of personal identity in detail and cites relevant examples.	Learner explores scientific theory about human origin on formation of personal identity.	Learner explores scientific theory about human origin on formation of personal identity leaving out minor details.	Learner explores scientific theory about human origin on formation of personal identity leaving out major details.
Ability to describe peaceful ways of resolving conflicts in the family.	Learner describes peaceful ways of resolving conflicts in the family in detail using relevant examples.	Learner describes peaceful ways of resolving conflicts in the family.	Learner describes peaceful ways of resolving conflicts in the family omitting minor details.	Learner describes peaceful ways of resolving conflicts in the family omitting major details.
Ability to describe the Swahili civilisation along the East African coast.	Learner describes the Swahili civilisation along the East African coast in detail with concrete examples.	Learner describes the Swahili civilisation along the East African coast.	Learner describes the Swahili civilisation along the East African coast leaving out a few details.	Learner describes the Swahili civilisation along the East African coast leaving out many details.

Level Indicator	Exceeds Expectations	Meets Expectations	Approaches Expectations	Below Expectations
Ability to outline effects of Trans-Saharan slave trade in Africa.	Learner outlines effects of Trans-Saharan slave trade in Africa with a smooth flow of ideas and cites relevant examples.	Learner outlines effects of Trans-Saharan slave trade in Africa.	Learner outlines effects of Trans-Saharan slave trade in Africa but mixes up minor ideas.	Learner outlines some effects of Trans-Saharan slave trade in Africa omitting major details but mixes up major ideas.
Ability to examine types and effects of migration in Africa.	Learner examines types and effects of migration in Africa in detail and provides relevant illustrations.	Learner examines types and effects of migration in Africa.	Learner examines types and effects of migration in Africa omitting a few details.	Learner examines types and effects of migration in Africa omitting many details.
Ability to explain ways of building a healthy self-esteem in social cultural diversity and inclusion.	Learner explains ways of building a healthy self-esteem in social cultural diversity and inclusion in detail.	Learner explains ways of building a healthy self-esteem in social cultural diversity and inclusion.	Learner explains ways of building a healthy self-esteem in social cultural diversity and inclusion leaving out minor details.	Learner explains ways of building a healthy self-esteem in social cultural diversity and inclusion leaving out major details.

Ability to identify situations that may lead to conflicts in family.	Learner identifies situations that may lead to conflicts in the family with smooth flow of ideas and provides concrete examples.	Learner identifies situations that may lead to conflicts in the family.	Learner identifies situations that may lead to conflicts in the family with minor mix up of ideas.	Learner identifies situations that may lead to conflicts in the family with major mix up of ideas.
Ability to show how best practices from early civilisations have contributed to the modern world.	Learner shows how best practices from early civilisations have contributed to the modern world in detail.	Learner shows how best practices from early civilisations have contributed to the modern world.	Learner shows how best practices from early civilisations have contributed to the modern world while omitting minor details.	Learner shows how best practices from early civilisations have contributed to the modern world while omitting major details.
Ability to demonstrate assertiveness in promotion of social justice in the society.	Learner demonstrates assertiveness in promotion of social justice in society in varied contexts.	Learner demonstrates assertiveness to promotion of social justice in society.	Learner demonstrates assertiveness in promotion of social justice in society in somewhat varied contexts.	Learner demonstrates assertiveness in promotion of social justice in society in limited contexts.

Ability to manage peer pressure in a culturally diverse environment.	Learner manages peer pressure in a culturally diverse environment discernibly.	Learner manages peer pressure in a culturally diverse environment.	Learner manages peer pressure in a culturally diverse environment in a somewhat discernible manner.	Learner manages peer pressure in a culturally diverse environment in an indiscernible manner.
Ability to apply peaceful ways of resolving conflicts in the family.	Learner applies peaceful ways of resolving conflicts in the family always.	Learner applies peaceful ways of resolving conflicts in the family.	Learner applies peaceful ways of resolving conflicts in the family on many occasions.	Learner applies peaceful ways of resolving conflicts in the family on very few occasions.

STRAND 4.0: NATURAL AND HISTORIC BUILT ENVIRONMENTS

Strand	Sub-Strand	Specific Learning Outcomes	Suggested Learning Experiences	Suggested Key Inquiry Question(s)
4.0 Natural and Historic Built Environments	4.1 Map Reading and Interpretation (12 Lessons)	<p>By the end of the sub-strand, the learner should be able to:</p> <ul style="list-style-type: none"> a) interpret maps using marginal information, b) calculate areas of places on a topographical map, c) describe the different methods of representing physical features on topographical maps, d) apply critical thinking skills in map interpretation, e) value map reading and interpretation in day-to-day life. 	<p>The learner is guided to:</p> <ul style="list-style-type: none"> • exchange new ideas when discussing in groups the marginal information on a map and present it in class, • brainstorm on types and uses of scales and present in class, • collaborate with others to practice scale conversions on a topographical map and critique each other's work, • measure distances on a topographical map and share in class, • calculate the area of different places on a topographical map and share in class, • accomplish the task of carrying out a research on methods of representing physical features (<i>drainage, relief features and vegetation</i>) and share in class, • draw diagrams of the relief and drainage features on a topographical map, 	How can critical thinking be used in map interpretation?

			<ul style="list-style-type: none"> use digital or print resources to search for essential critical thinking skills necessary for map interpretation (observation, analysis, communication, inference). 	
--	--	--	---	--

Core competencies to be developed:

- Creativity and Imagination: Learners exchange new ideas when discussing in groups the marginal information on a map.
- Digital literacy: Learners use digital devices to search for essential critical thinking skills necessary for map interpretation.

Values:

- Unity: Learners collaborate with others when practicing scale conversions on a topographical map.
- Responsibility: Learners accomplish the task of carrying out a research on different methods of representing physical features.

Pertinent and contemporary issues (PCIs):

Social cohesion: Learners work harmoniously in groups to practice scale conversions on a topographical map.

Link to other subjects:

- The learner applies drawing skills from Creative Arts in drawing diagrams of the relief and drainage features on a topographical map.
- The learner applies calculation skills from Mathematics in working out the area of different places on a topographical map.

Strand	Sub-Strand	Suggested Learning Outcomes	Suggested Learning Experiences	Suggested Key Inquiry Question(s)
4.0 Natural and Historic Built Environments	4.2 Weather and Climate <ul style="list-style-type: none"> ● <i>Desert</i> ● <i>Semi-desert</i> ● <i>Tropical</i> ● <i>Mediterranean</i> ● <i>Mountain</i> <p>(10 Lessons)</p>	By the end of the sub-strand, the learner should be able to: <ul style="list-style-type: none"> a) examine factors influencing climate in Africa, b) illustrate distribution and characteristics of major climatic regions of Africa, c) explore positive ways of managing disaster-related stress, d) apply problem-solving skills in addressing effects of climate change on the environment, e) recognise the effects of climate on human activities. 	The learner is guided to: <ul style="list-style-type: none"> ● use print or digital resources to research on the factors influencing weather and climate in Africa and share in class, ● draw a map of Africa and indicate the major climatic regions and display it in class, ● view a video clip/film or use print materials on the distribution and characteristics of major climatic regions of Africa, (<i>desert, semi-desert, tropical, mediterranean and mountain</i>) and make short notes, ● discuss ways of managing stress during disasters caused by climate change, ● brainstorm on the causes and effects of climate change and share in class, ● become aware of own responsibility in the society as 	1. How does climate change affect human activities? 2. How can one manage stress during disasters?

			<p>they perform a skit on problem-solving skills to address effects of climate change,</p> <ul style="list-style-type: none"> ● find extra information as they engage with a resource person to discuss the effects of weather and climate on personal wellbeing and human activities. 	
Core competencies to be developed:				
Critical thinking and Problem solving: Learners find extra information when engaging with a resource person to discuss the effects of weather and climate on personal wellbeing and human activities.				
Values:				
<ul style="list-style-type: none"> ● Patriotism: Learners become aware of their own responsibility in addressing the effects of climate change in the community. ● Responsibility: Learners engage in the task of drawing a map of Africa and indicating the climatic regions. 				
Pertinent and contemporary issues (PCIs):				
<ul style="list-style-type: none"> ● Disaster and risk reduction: Learners brainstorm in groups on the causes and effects of climate change and share in class. ● Environmental education: Learners become aware of the effects of climate change as they perform a skit on problem-solving skills to address effects of climate change. 				
Link to other subjects:				
The learner applies drawing skills from Creative Arts in drawing a map of Africa and indicating the climatic regions.				

Strand	Sub-Strand	Specific Learning Outcomes	Suggested Learning Experiences	Suggested Key Inquiry Question(s)
4.0 Natural and Historic Built Environments	4.3 Vegetation in Africa (8 lessons)	By the end of the sub-strand, the learner should be able to: a) explain factors influencing vegetation distribution in Africa, b) describe the characteristics of major vegetation regions of Africa on the map, c) locate the major vegetation regions of Africa, d) apply methods of conserving vegetation in the community, e) explore personal interests in conservation of vegetation for career exploration, f) appreciate vegetation conservation for environmental sustainability.	The learner is guided to: <ul style="list-style-type: none"> ● brainstorm in groups factors influencing vegetation in Africa and do a presentation in class, ● carry out a field excursion of the immediate environment and identify the different types of vegetation, ● use digital or print resources to find out the vegetation regions in Africa, ● use digital or print resources to identify the characteristics of vegetation in Africa, ● draw the map of Africa and indicate the vegetation regions, ● care for the environment when creating posters on methods of conserving vegetation in the locality, ● write essays on ways of caring for vegetation in the school community, ● speak clearly as they debate on the importance of vegetation in the community and make short notes, 	Why should we care for vegetation in our environment?

		<ul style="list-style-type: none"> reflect and share on their personal interest in professions associated with vegetation conservation. 	
--	--	--	--

Core competencies to be developed:

- Communication and Collaboration: Learners speak clearly during debate on importance of vegetation in the community.
- Citizenship: Learners enhance skills of caring for the environment when creating posters on methods of conserving vegetation in the locality.
- Digital literacy: Learners use digital devices to accomplish the task of finding out the vegetation regions in Africa.

Values:

- Unity: Learners display team spirit when carrying out a field excursion of the immediate environment and identify the different types of vegetation.
- Responsibility: Learners accomplish the task of finding out the vegetation regions in Africa.

Pertinent and contemporary issues (PCIs):

Environmental education: Learners participate in debating on the importance of vegetation in the community.

Link to other subjects:

The learner applies skills from Agriculture as they discuss methods of conserving vegetation in the locality.

Strand	Sub-Strand	Specific Learning Outcomes	Suggested Learning Experiences	Suggested Key Inquiry Question(s)

Learner describes the process of effective communication on human rights issues.	Learner describes the process of effective communication on human rights issues but leaves out minor details.	Learner describes the process of effective communication on human rights issues but leaves out major details.
Ability to describe qualities and responsibilities of a global citizen in an interconnected society.	Learner describes qualities and responsibilities of a global citizen in an interconnected society with consistency and provides relevant examples.	Learner describes qualities and responsibilities of a global citizen in an interconnected society.	Learner describes qualities and responsibilities of a global citizen in an interconnected society with minor inconsistencies.	Learner describes some qualities and responsibilities of a global citizen in an interconnected society with major inconsistencies.
Ability to explore ways in which Nobel Prize nominees responded to injustice situations in society.	Learner explores ways in which Nobel Prize nominees responded to injustice situations in the society in detail.	Learner explores ways in which Nobel Prize nominees responded to injustice situations in society.	Learner explores ways in which Nobel Prize nominees responded to injustice situations in society leaving out minor details.	Learner explores ways in which Nobel Prize nominees responded to injustice situations in society leaving out major details.

Level Indicator	Exceeds Expectations	Meeting Expectations	Approaches Expectations	Below Expectations
Ability to illustrate roles of the three arms of the Government of Kenya.	Learner illustrates roles of the three arms of the Government of Kenya, citing examples from the Constitution.	Learner illustrates roles of the three arms of the Government of Kenya.	Learner illustrates roles of only two arms of the Government of Kenya.	Learner illustrates roles of only one arm of the Government of Kenya.
Ability to demonstrate ways in which children are protected against violation of their rights in Kenya.	Learner demonstrates ways in which children are protected against violation of their rights in Kenya with smooth flow of ideas and cites relevant examples.	Learner demonstrates ways in which children are protected against violation of their rights in Kenya.	Learner demonstrates ways in which children are protected against violation of their rights in Kenya but mixes up a few ideas.	Learner demonstrates some ways in which children are protected against violation of their rights in Kenya but mixes up many ideas.

APPENDIX I: GUIDELINES FOR INTEGRATING COMMUNITY SERVICE LEARNING (CSL) PROJECT

Introduction

In Grade 8, learners will undertake an integrated Community Service Learning (CSL) project of choice from a single or combined subject. The CSL project will enable the learner to apply knowledge and skills from other subjects to address a problem in the community. The implementation of the integrated CSL project will take a whole school approach, where all members of the school community including teachers, school administration, parents/guardians/ local community, and support staff are involved. It will be a collaborative effort where the teacher of Social Studies coordinates and works with other subject teachers to design and implement the integrated CSL projects. The teachers will select a theme drawn from different Learning Areas and the broader categories of pertinent and contemporary issues (PCIs) for the CSL project. It should also provide an opportunity for development of core competencies and nurturing of values. Learners will undertake **one common** integrated class CSL project following a 6-step milestone approach as follows:

Milestone	Description
Milestone 1	Problem Identification Learners study their community to understand the challenges faced and their effects on community members. Some of the challenges in the community can be: <ul style="list-style-type: none">● Environmental degradation● Lifestyle diseases, communicable and non-communicable diseases● Poverty● Violence and conflicts in the community● Food security issues

Milestone 2	Designing a solution Learners create an intervention to address the challenge identified.
Milestone 3	Planning for the Project Learners share roles, create a list of activities to be undertaken, mobilise resources needed to create their intervention and set timelines for execution
Milestone 4	Implementation The learners execute the project and keep evidence of work done.
Milestone 5	Showcasing /Exhibition and Report Writing Exhibitions involve showcasing learners' project items to the community and reflecting on the feedback. Learners write a report detailing their project activities and learnings from feedback.
Milestone 6	Reflection Learners review all project work to learn from the challenges faced. They link project work with academic concepts, noting how the concepts enabled them to do their project as well as how the project helped to deepen learning of the academic concepts.

Note: The milestones will be staggered across the 3 terms of the academic calendar.

Assessment of CSL integrated Project

Assessment for the integrated CSL project will be conducted formatively. The assessment will consider both the process and end product. This entails assessing each of the milestone stages of the integrated CSL class project. It will focus on 3 components namely: skills from various learning areas applied in carrying out the project, core competencies developed and values nurtured.

APPENDIX II: SUGGESTED ASSESSMENT METHODS, SUGGESTED LEARNING RESOURCES AND NON-FORMAL ACTIVITIES

	Sub-Strand	Suggested Assessment methods	Suggested Learning Resources	Non-formal activities
